Price \$24.95

Age 7 to Adult

Thinklers! 4 is a hugely entertaining way to while away the hours while challenging your brain to think in exhilaratingly creative ways. The book contains 558 fascinating brain ticklers, visual riddles that require the would-be solver to gaze upon a single curious-looking photo (each of which is entertaining in its own right) while trying to make sense of how the various elements in the picture translate to language. For example, a photo of a tin can resting atop a red rubber ball = a can on a ball = cannonball, the answer! That was an easy one. Most require some pretty darned inventive thinking in order to correctly assess the meaning. But doing so is both invigorating and fun, and once your brain gets in the groove you'll be amazed at how clever you are! Thinklers! 4 is divided into three sections: What's the Word? (each answer is a single word), Rhyme Time Re-do (answers are two words that rhyme), and What's the Phrase! (each answer is a phrase). The answers appear at the end of each section, but we suggest striving not to look unless you are fairly certain you've got it. Solving these cleverly devised brain ticklers is just too much fun to miss out on!
